Br. C. C.

DETAILED ACTION

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (I) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3683

2. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being

indefinite for failing to particularly point out and distinctly claim the subject matter which

Page 3

applicant regards as the invention.

• Claim 1 recites numerous indefinite terms. These are the examples: such as, for

examples, the latter, this, when appropriate, making it possible in particular, its,

and/or, if, etc. Because of the numerous indefinite claimed features, it is unclear

of what features are being claimed and which features are being recited but not

claimed. Claim 1 and all the dependent claims are being treated as best \

understood.

Please review the dependent claims for the same indefinite terms mentioned

above and correct accordingly.

In claim 4, variable "g" needs to be defined.

In claim 6, variable "ylongisensor" needs to be defined.

In claim 13, it is unclear what is the claimed feature in claim 13; because claim

13 claims "the piloting device maintains the dynamic and/or static braking" in line

2, then in lines 4 and 5, contradictorily claiming "the piloting device does not

activate any of the dynamic and static braking".

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that

form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 3683

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-3, 7-9 and 11-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Fischer (US Pub. 2005/0173977 A1).

Re: claims 1-3, 7, 8 and 13, Fischer shows a system for controlling the state and operation of a motor vehicle equipped with a dynamic braking device 7 and a static braking device 8, as in the present invention, wherein the sensors are mentioned in paragraph [0017], the piloting device 4 receiving information from sensors and calculating braking orders and maintaining a braking force as claimed, see paragraph [0014], especially the last two lines where Fischer teaches when the vehicle is either on an even surface or on an incline.

Re: claim 9, Fischer shows in paragraph [0018] that the system for controlling would perform the release of the brakes when the vehicle is started to move again.

Re: claims 11 and 12, Fischer shows in paragraph [0019] that the system for controlling comprises an emergency mode with a cable actuator.

Re: claim 14, Fischer shows that the system can be activated by a brake pedal 2.

Allowable Subject Matter

5. Claims 4-6 and 10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 3683

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rapoport, Seipker, Ohta et al. and Witzler et al. are cited for other controlling systems.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lan Nguyen whose telephone number is (571) 272-7121. The examiner can normally be reached on Monday through Friday, 7:30am to 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Siconolfi can be reached on (571) 272-7124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
